

SOURCE WATER ASSESSMENT SUMMARY

Camp Bethel

Well Location	Town	Well Type	Source Water Area (acres)
124 Camp Bethel Road	Haddam	Drilled	18

Factor	Source Water Assessment Ratings For This Well	Rating
I	Environmental Sensitivity	Moderate
II	Potential Risk Factors	Low
Overall Susceptibility to Potential Sources of Contamination		Low
This rating is intended to indicate susceptibility to potential sources of contamination that may be in the wellfield source water area and does not necessarily imply poor water quality.		

Assessment Factors		Initial Assessment Findings	Recommendations for Enhanced Source Protection
I	Contaminants Detected in Source Water	Nitrate >1mg/L	Maintain monitoring levels specified in the Connecticut Public Health Code Section 19-13-B102
I	General condition of well and related equipment	Average	Maintain well and equipment according to best management practices
II	Number of DEP-inventoried Contaminant Release Points in Source Water Area	None	
II	Number of Potential Sources of Contamination in Source Water Area	None	
II	Land Use/Land Cover on the Well's Source Water Area <i>(Based on Satellite Imagery developed by University of Conn.)</i>	Commercial/Industrial 16.58% Residential 4.16% Agricultural 10.30% Open or Undeveloped 68.97%	Proactively work with local officials and developers to insure that only low risk development occurs within the source water area. Support and encourage the acquisition of open space land within the source water area.

General Recommendations For All Non-community Public Water Systems

Land Area Around Wellhead	Water system owner should provide information about the amount of land it owns or controls within a 200 foot radius around this well
Water System Source Protection Initiatives	Water system owner should provide information about basic practices employed to protect its drinking water sources
Local Government Source Protection Initiatives	Water system owner should support the development of local zoning or aquifer protection regulations to enhance the protection of public drinking water sources

I	General condition of well and related equipment	Average	Maintain well and equipment according to best management practices
II	Number of DEP-inventoried Contaminant Release Points in Source Water Area	1	Maintain adequate level of surveillance around contaminant release point sites to insure that groundwater contamination is not occurring
II	Number of Potential Sources of Contamination in Source Water Area	1	Periodically inspect sites and maintain water quality monitoring program consistent with the level of potential risk
II	Land Use/Land Cover on the Well's Source Water Area (Based on Satellite Imagery developed by University of Conn.)	Commercial/Industrial 14.74% Residential 4.77% Agricultural 4.56% Open or Undeveloped 75.93%	Proactively work with local officials and developers to insure that only low risk development occurs within the source water area. Support and encourage the acquisition of open space land within the source water area.
